Course Description:

Major career theories, and core career counselling processes of meaningful client engagement, exploration of potential, decision strategies, preparation and implementation strategies. Occupational information sources, computer-based career programs and services, and career guidance programs are evaluated from the context of theory and core career counselling processes.

This course is designed to provide students with an understanding of the theory and process of career counselling. The introduction to the course focuses on the theoretical foundations of career development followed by the integration of career theory within the 5 core processes of career counselling. Topics in this section of the course include meaningful client engagement, exploration of potential, decision strategies, preparation, and implementation strategies. Students will apply theoretical constructs in skill development and career counselling with diverse populations will be explored.

Course Objectives:

Upon completing this course, students will:

- Describe core theoretical constructs of career developmental theory
- Describe a process-based approach to career counselling
- Demonstrate effective intervention techniques with clients
- Apply career development principles in diverse populations

<u>Description:</u>	<u>Due Date:</u>	<u>% of Grade:</u>
1. Facilitated discussion	Variable	25%
2. Online responses to facilitated discussion	Variable	10%
3. Process demonstration - Virtual case notes	July 12 July 15	30%
4. Presentation on assessment resource	July 18 & 19	25%
5. Self-evaluation	July 23	10%

Late Penalty: Unless prior permission is obtained from the instructor, a penalty of 5% per day late will be applied to assignments submitted after the due date. Written physician notes will be required for waiver of this penalty.

Description of Assignments:

1. Facilitated discussion (25%)

To integrate career counselling theories covered in the course, students will lead a 30-40 minute class discussion on career development issues with diverse populations. In their discussions, students should speak to a) content, b) applications (i.e. case scenarios), and c) critical analyses. Students are encouraged to develop strong discussion questions to encourage input and debate from class members.

Sample topics and resources will be available for students to choose from, and other topics may be determined upon consultation with the course instructor. Dates for facilitated discussions will be determined in class.

2. Online responses to facilitated discussion (10%)

For this assignment, students will provide detailed, descriptive, and non-evaluative feedback to four (4) peers on their facilitated discussions. Responses will be facilitated through Moodle.

3. Process demonstration and self-analysis (30%)

This assignment provides students the opportunity to demonstrate counselling skills in the context of a career counseling case scenario. Students will form pairs and interview each other, identifying and addressing career-related concerns. Students are encouraged to utilize their own preferred theoretical approaches (i.e. theories identified in the course and/or the student's eclectic approach) and unique processes in the demonstration. Students will be video record their interviews to inform the development of their virtual case notes. Students will then analyze their integration of career development theories and processes, provide additional reflections, and evaluate their own performance.

Case notes will include:

- A case summary and identification of career-related concern **(5 marks)**
- Analysis of the demonstration in terms of theoretical approach(es) used, using specific examples from the interview **(10 marks)**
- Analysis of the demonstration in terms of the process(es) used, using specific examples from the interview **(10 marks)**
- Additional reflections **(5 marks)**
- Recommendation of grade for this component of the course with justification

4. Presentation on assessment resource (25%)

Students will work in teams and will prepare a critique of a formal assessment instrument used in career counselling. The critique should include:

- Introduction **(3 marks)**
 - the purpose of the instrument
 - intended audience, goals
 - format of the material
- Description of content, psychometrics, and theoretical underpinnings **(7 marks)**
- Critical review of utility and applicability to the intended audience **(10 marks)**
- A summary and generalizability of conclusions **(5 marks)**

Each team will present their work to the class.

5. Self-evaluation (10%)

The purpose of this assignment is for students to provide a self-evaluation of their work in this course. The self-evaluation will include a demonstration of student participation and engagement in the course, and an evaluative discussion of the quality of this participation and

engagement. The self-evaluation will also include a reflection on the student's experience with the course process, and how this impacted their learning in the course. Criteria for grading:

- Comprehensiveness and accuracy of the self-evaluation.
- Recommendation for a grade for this component of the course.
