

# BHSc PUBLIC HEALTH

## VISION

Strengthen public health capacity and advance public health science to improve health for all.

## MISSION

Providing students with a **solid foundation** in public health.

**Engaging students** in practical experiences in interdisciplinary public health.

Engaging in outreach to **empower communities** and advance population health.

**Partnering with local and global communities** to advance the science of public health and build knowledge through research.

**Fostering environments** conducive to learning, growth, and critical thinking.

**Modelling and teaching** BHSc Public Health core values.

## VALUES

Equity

Promote health equity and social justice by demonstrating respect for all, ensuring conditions that are inclusive, addressing social inequalities, and promoting social change.

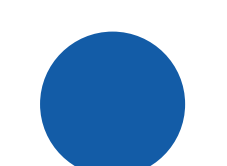

Engagement

Uphold the view that “everyone owns public health”; we are global citizens and leaders in advancing health for all.

Continuous Improvement

Participate in ongoing evaluation and quality improvement activities that demonstrate accountability and enable optimum outcomes for students, partners, and communities.
