Job Posting Information

Term Posted: Summer
Job Title: Agronomic Development Associate (Medicine Hat, AB)
Duration: 4 Months/Poss. Extension
Job Location: Medicine Hat, AB
Job Description:

Bayer Crop Science is a world leader in providing growers with innovative products and solutions for agriculture. Growers depend on Bayer Crop Science's comprehensive selection of insecticides, fungicides, herbicides and seed systems. At Bayer Crop Science, our team's commitment and dedication to Canadian agriculture is second to none.

What We Offer:

Each year, we hire over 180 university students from campuses across the country to work in Seeds, Research & Development, Sales and Market Development. Our goal is to provide interesting and challenging work, while at the same time having fun and celebrating successes.

We offer an orientation program, on the job training, a competitive compensation & perks package, and this role provides you with opportunity to expand your knowledge in the field of new product development.

Location(s): Medicine Hat, AB.

Agronomic Development Associates
(6-month summer terms – starting May)

Our Agronomic Development group works within a project team environment to plan and execute field

crop research trials and coordinate research projects with public and private contract co-operators to generate performance data needed for the commercialization of new agricultural production technologies.

Responsibilities:

- Product development studies relating to:
 - A diverse range of row, cereal and horticulture crops
 - Fungicide, herbicide and insecticide development
 - Data management

Job Requirements

Qualifications:

- Agronomic knowledge attained through pursuing your degree in Agriculture or another academic discipline coupled with experience in the Agriculture industry
- Demonstrated ability to work independently as well as contributing to a dynamic team environment
- Ability to deliver results
- Attention to detail
- Experience operating farm equipment is considered an asset
