Job Posting Information

Term Posted	Summer
Job Title	Student Software Developer
Duration	4-16 Months
Job Location	Calgary
Job Description	

An internship at Arcurve is definitely not a typical coffee-fetching, photocopying experience. We are driven to help produce superior graduates. No spectators here – Arcurve interns are actively engaged in innovative, exciting, real-life business projects. Our interns develop broad technology expertise, solid business acumen, and professional polish in a fun, friendly environment.

Instead of a bulleted list of job tasks, check out some of the real world projects and technologies our previous interns have used here: [Arcurve Internship](#)

Want to get a personal take on what this experience is like? Our interns speak out: [Internship Blog](#)

Job Requirements

You're a student. We get it. We don't expect you to come in with a glossy resume detailing your years of experience. However, what we do require is for you to demonstrate, on paper or otherwise:

- An interest in all things technical. And hey – if you have used technology to solve a problem – even

better!

- The ability to learn. It's often a cliché (after all – your parents told you to go to university to learn how to learn right? But in the world of technology – it's a reality.
- Creativity – in most everything and anything you do.
- The desire to work in a team. Yes, we know profs make you do it but do you WANT to and do you recognize the redeeming qualities in doing so? (Hint: there are some)
- Problem Solving skills – do you like problems? Great – here is one and we require you to send in your response along with your resume to apply! Arcurve Internship Challenge

Note: some coding experience an asset especially if you can walk us through what you did, why you did it and what you learned from your build.

Preferred Academic Level	Undergraduate
