Bachelor of Health Sciences

Aboriginal Health

Indigenous health is Canadian health. The health of Indigenous peoples in Canada is a complex social justice issue that can only be addressed by people who are creative, skilled, culturally competent, committed and passionate about righting historical wrongs and acting to create a more inclusive, equitable society. Learn traditional Indigenous teachings and contemporary perspectives by engaging with elders, knowledge keepers, health care professionals and other Indigenous peoples. Learn how Indigenous values, knowledge and practices foster healthy children, youth, adults, elders, families and communities.
